

About Shustoke C of E Primary School

Shustoke C of E Primary School is a warm and welcoming primary school set in a delightful rural setting. We are a small primary school with one class per year from Reception through to Year 6. We currently have 176 pupils on roll.

Our school's philosophy is centred on the development of the whole child. We aim to enable all children to achieve success intellectually and personally so that they grow up to be happy, confident, responsible citizens of the future.

Shustoke is a school that lives out its core values of respect, hope, compassion, perseverance, wisdom, and forgiveness. We want our children to experience life in all its fullness. These are modelled by adults and apparent in pupils' behaviour and attitudes.

Our values and vision permeate all of the school's work, as a result the school is a happy, purposeful environment with a clear moral purpose for education.

We are proud to be a Church of England School and belong to the Diocese of Birmingham. Being a Church School provides an additional dimension to our life in school and is intrinsic in our philosophy and culture. We pride ourselves on our Christian family ethos - it is a distinctive characteristic of school life. Staff do not need to be practising Christians, but they do need to subscribe to our values.

Staff model our values, and the children are rewarded for displaying those values. At Shustoke, we foster pupil achievement and self-belief through the provision of a broad and enriched curriculum. We constantly review and update our curriculum offer so as to take advantage of exciting new resources and current affairs as they arise.

We provide a stimulating environment where everyone feels welcome, secure and valued – meeting the needs and aspirations of the children, their families and the wider community through involvement of the whole school community in providing the highest quality education, within the context of Christian belief and practice.

Just as we encourage our children to improve on their previous best, we continually strive to further develop as professionals for the benefit of the children.
