About

The Post

The post will offer the successful candidate a fantastic opportunity to join our excellent, over-subscribed school, and to work within an inspirational and supportive team of staff. This post is permanent and will suit a colleague wishing to progress their career. The position starts on 1 September 2023. It is suitable for ECTs; they can be employed in July.

The Role

DEPARTMENT ETHOS

The science department has high expectations and offers a well-designed learning experience for all students. The key aim is to provide an excellent education in the sciences across the age and ability profile. The commitment to meet the abilities, skills and attributes of all allows our students to work towards, and achieve, their maximum potential.

Our department plan prioritises an agenda where every student matters, and as such we aim to provide enjoyment and intellectual stimulation through science, thus engendering success and achievement.

At present, there are nine full-time members of staff, and one trainee via the School Direct (salaried) and PGCE route. The Curriculum Leader is supported by one Deputy Curriculum Leader and one Assistant Curriculum Leaders, who share the responsibilities of leading the team. All teaching staff are supported by three experienced and dedicated technicians. Our current teaching team is a dedicated group of individuals committed to seeing all students achieve their potential. Colleagues collaborate closely and work exceptionally well together, with a clear philosophy of openness, sharing and mutual support. Collaboration across the school takes place, with science a key component of several cross-curricular projects.

CURRICULUM

In support of a whole-school commitment to the development of thinking skills and Assessment for Learning, the science programme of study promotes learning skills of a more general application, such as analysis, experimentation and problem solving. It also aims to develop in our students the ability to plan and organise their work effectively; to self-assess; and to work independently and within groups.

Members of the department employ a flexible variety of teaching and learning strategies using a range of differentiated resources. Teaching methods involve individual, pair and group work, and within each Key Stage, students work either at or above their current level of attainment. Students are clear as to the nature and purpose of the tasks they undertake, and confidence is maintained through effective use of Assessment for Learning and student self-evaluation of progress. ICT is an integral part of the programme of study, and colleagues teach using a variety of ICT resources; notably using the Interactive Whiteboard with a variety of dedicated software packages. Staff are expected to contribute to the development and production of resources through the department's areas on Microsoft SharePoint and OneDrive.

SCHEMES OF WORK

All students at Key Stage 3 follow a modular scheme using the National Curriculum Programmes of Study as a framework. The science strategy has been incorporated into the schemes, and teachers are expected to utilise a range of teaching styles and resources. Each module is assessed by end-of-module tests and open-ended investigations.

At Key Stage 4, all students obtain two or more GCSEs in science subjects. The AQA Combined Science: Trilogy course is taught over Years 10 and 11, with the most able students offered the opportunity to study separate sciences (biology, chemistry and physics) in Year 11. In the Sixth Form, students may study A levels in biology, chemistry, and physics, and all are extremely popular choices. We also offer the new level 3 applied science BTEC, delivered for the first time in September 2018. Many students continue their science studies at degree level.

TEACHING GROUPS

In Years 7 and 8, students are taught in form groups, while in Years 9 to 11, they are taught in ability groups. Our aim is to set challenges and provide support to enable students to make progress and achieve their full potential. We foster success through the use of end of unit, assessment tests along with regular whole year assessments with commendation related to improvement in performance.

Thus, movement between sets is encouraged and takes place regularly. Teaching groups across the school rarely exceed thirty, and lower-ability groups are smaller in number.

FACILITIES

The curriculum area is well-resourced, currently in a pleasant suite of ten spacious, fully-equipped laboratories, including four new labs opened in the autumn of 2018. The faculty is well-resourced with textbooks, work cards and ICT teaching resources. Interactive displays are plentiful and students' work is displayed and updated regularly, to encourage motivation and continue to engage student interest.

EXTENDED SCHOOL

Our extra-curricular provision includes a popular Year 7 Science Club and an outstanding medics club for budding Sixth Form medical students which enhances the vast range of in-school and off-site opportunities. Booster classes and revision sessions are offered to students at Key Stage 4. Students enjoy their involvement in these additional opportunities.

Parents/carers are supportive and are kept informed of all aspects of their child's life at school through, for example, the school website, news stories, social media, and the Annual Review. The Student Planner and Insight App records all homework set and is also a means of communicating positive comments, commendations and important dates.
