## **Business and Computing Faculty at The Bolsover School**

Business and Computing is a popular choice amongst students at The Bolsover School. The Business and Computing faculty offer a variety of different subjects including; Computing at KS3 taught over one hour per week, GCSE Business Studies, BTEC Digital Information Technology, GCSE Computer Science and Cambridge Nationals in Creative iMedia. The popularity with students at Key Stage 4 is an important part of the wider curriculum offering at The Bolsover School, thus enabling the school to offer a broad and balanced curriculum to all. It is important that our students can follow a pathway which is specific to their needs, allowing them to achieve their potential.

The Business and Computing Faculty consists of two full time teachers (including the successful applicant) and one part time teacher. The Business and Computing Faculty will become an excellent mix of staff with good experience, which would allow them to support effectively any new colleague. Schemes of work are established at all key stages, in all subject areas.

The school and this faculty area have fantastic facilities with all classrooms offering access to interactive whiteboards, visualizers, data projectors and a range of other Computing and teaching materials. The school has two dedicated Computing based classrooms with desktop computers, alongside large numbers of portable devices. The faculty will share a staff base with the Maths Faculty, which offers access to Computing facilities and workspace for lesson preparation and marking.
