

Northfleet
School for Girls
Dream Big and Achieve

THREE YEAR VISION

2024 - 27

We are very proud of our school and its vision.

This document shows how we will continue to pursue excellence in all we do.

Our aim is to help every young person to Dream Big and Achieve through:

- High expectations
- Working together
- Enjoying the journey

All students have talents, our role is to support everyone to flourish in their passions.

High academic expectations and whole person development are equally important in our students' future success.

High Expectations will be achieved through:

- High quality teaching and learning which engages and challenges all students, leading to the highest achievement for all.
- A culture where all staff are continually learning and developing as innovative, successful practitioners.
- Students who positively engage with their learning, are reflective, have ambition to achieve and succeed beyond their expectations.
- Students and families trusting us to deliver a great education in partnership with their hard work and proactivity.
- Students supported by the school to be clear on how to achieve exciting life opportunities, realise outstanding results and developing life skills to fully capitalise on their potential.
- Students developing leadership skills and aspiring to be leaders of the future.
- Students displaying strong morals and manners, developing caring attributes whilst taking pride in their work. All are passionate about positively contributing to their community.
- Being an inclusive environment where everyone can achieve regardless of background, barriers or starting points.

Working Together will be achieved through:

- A clear and effective partnership between student, parent and staff, with everyone pursuing excellent outcomes.
- Parents who feel that they are able to effectively engage with school staff and work together for the best of their child.
- Strong working relationships with feeder schools to ensure a smooth and effective start to students' time at NSfG.
- Knowing that all students can experience barriers to success yet ensuring strong support to reach the best possible outcomes despite any setbacks. Supporting students to take risks and overcome confidence barriers.
- Being a proactive, caring contributor to the local and international communities, learning the value of giving to others.
- Students who engage as open-minded leaders of learning in the classroom.
- Students, families and staff who feel this is 'their school', that they have a say and are active members in further school improvement.
- Considerable use of alumni and other inspirational experiences to motivate students to expand horizons.

Enjoy the Journey will be achieved through:

- A culture of praise where all staff and students are celebrated for their contributions to the community as well as individual successes.
- A wide range of clubs, trips and encounters which not only enrich the curriculum, but encourage international mindedness and show the exciting possibilities life brings!
- Students, families and staff who look back on their time as part of the NSfG community with happy memories. Students see NSfG as a school where they positively developed as a whole person, not just a place of academic education.
- Positive relationships across the school, where there is a culture of building each other up and celebrating our own unique identities.
- Promoting individual talents in all students and staff, encouraging all to develop their skills and passions through amazing facilities and opportunities.
- Staff who value working at NSfG, engage with the school/wider community and are invested in, through career development.
- Exceptional facilities and 'centres of excellence', which give students opportunity to flourish in their talents.
- Actively promoting our Dream Big Attributes and the IB Learner Profile for the application of personal and social skills to real life situations.

The best education is when school, students and parents work effectively as one team.

“You have taught her so much - not just a top class education, but how to be an all round kind, good, hardworking young woman.”

- Parent Feedback
