

Allestree Woodlands School

Technology, Business & Computing, Health & Social Care Faculty

This is an excellent opportunity for anyone wishing to build on and develop their experience within this successful faculty at Allestree Woodlands School. The person appointed will be working with an enthusiastic, hardworking and friendly team. Along with the Faculty Director there is also a Deputy Director and a Assistant School Director within the faculty who is also responsible for the day to day running of faculty and the curriculum. The other members of the team have taken on extra responsibilities that reflect their strengths.

Health and social care is a popular and successful subject at Level 2 and we have launched Level 3 BTEC as part of our post 16 provision from September 2021. This is an exciting time to join the team and offers a chance to really contribute to the development of the course and curriculum as part of a supportive and ambitious faculty.

We set ourselves challenging targets and consistently look to raise achievement across the faculty subjects. The faculty is based on 3 floors. We have 2 computing suites, 2 specific Business classrooms, 2 DT rooms, 2 Graphics rooms and engineering resources along with two Food Technology rooms and one Textiles room. Each member of the team has a teaching room base, which is enhanced by display work undertaken by our Curriculum Assistant.

Within Technology, at Key Stage 4, subjects currently on offer are Design & Technology, Engineering, Food & Nutrition, Health & Social Care, Computing, Creative Media and Business Studies. Students currently have 5 hours per fortnight teaching per option subject.

Examination results in the faculty are consistently above the national average. We do not intend to become complacent after our many successes and are constantly striving to build on our achievements. At post-16 we provide 3D Product Design, Computer Science and Business Studies, with the exciting opportunity of delivering H&S care, which is new this year. All Level 3 subjects are taught for 10 hours across the fortnight.

We are seeking a colleague who is a team player, enthusiastic, practical, and committed and uses his/ her own initiative.
