Mathematics at The Bolsover School

The subject area of Mathematics is an important part of the wider curriculum offering at The Bolsover School, given the large contribution it offers to progress 8 and attainment 8 scores.

An exciting opportunity has arisen meaning we are looking for a dynamic and enthusiastic teacher of Mathematics to help to continue the positive direction in which the department is moving. This vacancy offers a tremendous opportunity for somebody wanting to begin their Mathematics teaching career or similarly would appeal to someone looking for a new direction in their career. We can offer access to a wide range of CPD opportunities, both subject-related and in a wider teaching and learning context.

The Mathematics team currently consists of 9 teachers: 7 full time and 2-part time staff. The Mathematics faculty is a good mix of experienced colleagues and those who are in the early years of their teaching career. The faculty has a dedicated member of staff for teaching and learning who leads by example on a daily basis and an Assistant Headteacher link with 14 years of experience overseeing the department. This mix of staff will offer any new colleague a wealth of experience from which to draw upon. Schemes of work are established at all key stages and interleaving is an integral part of the curriculum delivery.

At key stage 4, the school follows the EDEXCEL curriculum for Mathematics GCSEs. We also offer an additional opportunity for the ablest students to study Further Mathematics.

Each classroom within the department offers access to interactive whiteboards, visualisers, data projectors and a range of other ICT and teaching materials.

Mr T Davies
Head of Mathematics
