

TEACHER OF MATHEMATICS

This is an excellent opportunity to join a successful department in an outstanding school. The department has 7 designated Mathematics rooms in a new £2.4 million teaching block. Each room is equipped with an 84 inch Promethean interactive screen. The department also has access to its own ICT suite in the new building.

At Key Stage 3 the department is well resourced with the Oxford Maths Links series. The Department uses software packages such as, Autograph and Geometers Sketchpad and makes good use of the application of ICT in the teaching of mathematics. Key Stage 4 is resourced with the Collins GCSE Mathematics textbooks.

Pupils are set by ability throughout Key Stage 3 and 4 and Mathematics is a very popular choice for our post 16 students with both A Level Mathematics and Further Mathematics offered. The department also delivers excellent outcomes at all levels.

Pupils are regularly entered for the different tiers of the National Mathematics Competition and other regional and national competitions.

We are looking to recruit a confident and highly motivated teacher with the experience necessary to support our learners for a January 2022 start.
