

THE HOLLINS

Departmental Information

The mathematics department has a highly qualified teaching staff of six. Each member of staff has their own classroom, interactive whiteboard and a full class set of tablet devices.

The department benefits from a lead practitioner and strong leadership team. Over the last four years there has been significant improvements in performance in all areas. Excellent teaching and learning, an ambitious inclusive curriculum, collaboration, focused professional development and positive relationships with pupils have all contributed to a successful and motivated department.

Our department is well resourced and technology is used on a regular basis to enhance teaching and learning. We have invested in proven software in Learning by Questions (LBQ) and Sparx maths which supports our curriculum intent in developing fluency, reasoning and problem-solving with our pupils.
