

Matravers School

The Maths Department

We are a department that provides excellent teaching and learning for all pupils in our care. As a team we are dedicated to providing students with a broad, balanced and developmental curriculum. We commit to developing the skills of the individual at the level appropriate to them. Everything from functional numeracy through to complex mathematical reasoning. This enables students at Matravers School to take the most appropriate pathway to them once they leave full time education.

We are a lively and highly motivated team of specialist teachers, ranging in experience. Where possible decisions are reached through collegiate team based discussion and management. All staff are actively encouraged to contribute towards building the department to drive forward improvements in our practice and as part of their own CPD.

All team members have their own teaching base which is equipped with state of the art technology in our brand new multi million pound STEM centre. Teachers have access to computer rooms and classroom laptops

The Curriculum

KS3: Our students are organised into streams based on ability. We follow a bespoke 3 year scheme of work which has been adapted from the White Rose Maths Mastery course. This is designed to ensure that pupils have the key Mathematical knowledge to be successful at GCSE.

KS4: All students are entered for AQA Maths GCSE. Pupils are set based on ability, with half the cohort are entered into higher tier and the other half of the cohort entered into foundation.

KS5: We currently offer both EdExcel A Level in Mathematics and Further Mathematics.

The school is committed to safeguarding and promoting the welfare of children and young people and expects all staff and volunteers to share this commitment
