

February 2021

Dear Applicant,

Welcome to King's School Science Department.

I would like to take this opportunity to tell you a little more about our team. As a small department, we benefit from being able to work closely together, collaborating to share resources and planning, in addition to supporting each other in many other ways. We also have two very supportive and enthusiastic technicians.

We have moved into six fully equipped labs on the top floor of the new school building. The laboratories have wonderful views across the whole of Brighton on one side or the downs on the other.

We are a well-organised team, demonstrated through our cheerful classroom areas and assessment structure. We are friendly, creative and enthusiastic, and take care to ensure that everyone's opinions and ideas are equally valued. We constantly welcome and implement new ideas and take the opinions of all into consideration to ensure our Science curriculum is engaging and up to date.

We enjoy taking the students on trips to enrich their Science experience, previously we have planned trips to Herstmonceux, Science live, Big Bang events and Salters chemistry competitions.

Finally, we are sociable and enjoy meeting up outside of school for dinner (when we are allowed!) in addition to benefiting from very positive working relationships with each other.

I hope to meet you at interview and look forward to sharing more about our department with you then.

Yours sincerely,

Mrs A Coles
Head of Science
